**PAC170A**

Dimensions

580mm (w)

375mm (d)

1050mm (h)

**Weight: 16.5kg**

**PAC170A Small Portable Evaporative Cooler**

- o **Great for a small area**
- o Evaporative Coolers use evaporation to cool the air. In an evaporative cooler a pump circulates water from the 40 Litre reservoir on to a cooling pad, which becomes very wet. The fan draws air from the area through the damp pad, as it passes through the pad the air is cooled by evaporation
- o Less expensive to operate around one quarter of the cost to run a portable AC unit
- o Evaporative cooling increases humidity. In dry areas or low humidity, this may improve comfort and decrease static electricity problems
- o Area covered up to 30m<sup>2</sup>
- o LED Control panel with option remote control
- o Airflow = 1111 Litres / second
- o Current = 0.78amps
- o Water consumption around 3 to 8 Litres / hour
- o **Ideal for Offices and areas that cannot accommodate a Portable Air-Conditioner**
- o Installations are made simply, without structural changes
- o Relatively quiet operation <61dB at 1 m, 4 speed
- o Fitted with "Electric Leakage protection switch"
- o Easily portable yet quite powerful & effective
